SUMMARY

Versatile MERN Stack Web Developer with **2+ years** of experience in crafting user-friendly UI using **React, Redux-Saga, Node JS, Express JS, Next Js, and Mongo DB**. Adept at dynamic UI development through **API integration**, with a strong focus on testing, **Agile workflow**, and process optimization.

EDUCATION

Bachelor's of Engineering 2016 - 2019

Marathwada Mitra Mandal's College of Engineering, Pune

Mechanical Engineering - 7.66

PROFESSIONAL EXPERIENCE

Infosys, Pune - Westpac Banking Corporation

Nov 2021 - Present

ROLE : Web Developer

- Implemented user-friendly UI using **HTML, CSS, JavaScript, React JS**, and **Next Js**, along with **Material UI** and organization Storybook.
 - Developed **Express framework** services using **Node.js** to connect with downstream services.
 - Designed **Swagger 2.0** for services, making it easier for other developers to adapt to them in the future.
 - Conducted thorough testing, wrote **jest tests**, and ensured code quality for seamless development processes using Bitbucket.
 - Carried out **sanity testing**.
 - Collaborated in an **Agile environment**, aligning with business requirements and ensuring timely project delivery.
 - Diagnosed and resolved technical issues on **ServiceNow** and **ALM**, ensuring uninterrupted system operation.
 - Mentored junior developers, fostering skill development, and contributing to the team's overall growth.
-

SKILLS

- **Frontend:** React JS, Redux, Redux Saga, Material UI, JavaScript, HTML/CSS, Next js
 - **Backend:** Node JS, Express JS, MongoDB, API Integration, Swagger 2.0
 - **Design:** UI/UX Design (Figma), Responsive Design, Component-based Architecture
 - **Version Control:** Git, Bitbucket
 - **Project Management:** Jira, Agile Methodology
 - **Tools:** ServiceNow (SNOW), Splunk, Application Lifecycle Management (ALM)
-

PROJECTS

[Employee Review System](#)

- An employee review system is a structured process organizations use to assess and evaluate employees' performance, skills, and contributions. It typically involves regular feedback sessions, goal-setting, and performance discussions between employees and their supervisors to facilitate workplace growth, alignment, and improvement.
 - **Tech stack:** Node JS, Express, MongoDB, Javascript, EJS, CSS.
-

PROJECTS

Issue Tracker

- An issue tracker, implemented with technologies like Node.js, EJS, and MongoDB, is a web-based system that facilitates the tracking, management, and resolution of tasks, bugs, and enhancements in projects. It allows collaborative teams to organize work, assign tasks, and monitor progress, enhancing project efficiency and communication.
- **Tech stack: Node JS, Express, MongoDB, Javascript, EJS.**

Comercial Website

- Develop commercial websites using react framework - Next.js, Material UI. Creating an efficient dictory system for easy adaptability for future development.
- **Tech stack: Next Js, Shadcn UI.**
